1. Introduction

The Insurance Institute of South Africa as a professional body is required in terms of the South African Qualifications Authority (SAQA) requirements to ensure that its professional members embark on continuing professional development. CPD is basically lifelong learning. There are a variety of approaches to professional development, including consultation, coaching, communities of practice, lesson study, mentoring, reflective supervision, and technical assistance

The IISA provides an administrative platform for the Insurance Industry, for the purpose of defining and classifying CPD activities, recording these activities and providing monthly reporting in respect thereof.

This document serves to provide definitions relating to CPD activities for the guidance of professionals, training providers and the industry.

Oversight of the CPD management falls within the Professional Standards Committee (PSC), a board subcommittee. This oversight is implemented through the CPD committee, a subcommittee of the PSC, together with the management team at IISA.
